

COVID-19 and the vaccination of foreigners within our medical insurance for foreigners Welcome

For comprehensive care insurance (i.e. KOMPLEX, Dítě +, Baby and Prenatal tariffs), we plan to cover the voluntary vaccination against COVID-19 in addition to the existing insurance terms and conditions.

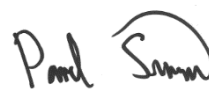

Reimbursement of vaccination costs will be made by the insurance company in accordance with the conditions set by state administration bodies, and only for vaccinations carried out within official vaccination centers in the Czech Republic and performed exclusively with vaccines approved in accordance with EU / Czech legislation, EMA and SÚKL.

The Ministry of Health has not yet put in place a registration system for vaccinating foreigners, but according to available information, they are working intensively on it. For more information please refer to our **Public promise** to vaccinate foreigners insured with health insurance Welcome against COVID-19 (available only in CZ language as a binding contractual language).
